

# Joint Application to Higher Education, Spring 2024

[Suomeksi](#) | [På svenska](#)

Application period Jan. 3, 2024 at 08:00 AM EET - Jan. 17, 2024 at 03:00 PM EET

## HOW TO FILL IN THE APPLICATION FORM

### This is how you fill in the form

1. Find out which study programmes you are going to apply to in the joint application. You can choose only programmes offered in the spring joint application to this form.  
[Proceed to spring joint application study programme listing.](#)
2. Fill in the application form. Please note that in order to submit the application form you are required to answer at least the mandatory questions. You can check the missing information by clicking "Check x answers" at the top of the page (Under Submit application button).
3. Click Submit application button on the top right corner of the page. After submitting the application, you will receive a confirmation email to the address you have given on the application form.

Supported web browsers: Studyinfo is supported on the newest versions of the following browsers: Mozilla Firefox, Google Chrome, Microsoft Edge and Safari

Read the instructions on the application form carefully!

### Consider the following on the application form (Joint application to higher education):

- The application form cannot be saved as a draft. After submitting the application you can return to your application form to make changes and upload attachments. You can make changes to your application until the application period closes (17 January 2024 at 3.00 PM EET). You can usually upload attachments also after the application period has closed (check the exact deadlines for each attachment on the application form).
- You will find instructions on how to upload attachments and deadlines for when to upload them on the application form. You will be asked to upload attachments based on the answers you have given to the questions on the application form. You can upload attachments as you are filling in the application form or you can upload them later. You can see the deadline for an individual attachment and the method of delivery next to the upload button on the form. Some of the higher education institutions might ask you to send attachments via mail. Some attachments may be asked multiple times on the application form. In this case, you are required to upload the same attachment in multiple sections on the application form.
- You will receive a confirmation of your submitted application to the email you have given on the application.
- The confirmation email includes a link that you can use to make changes to your application during the application period. If you have a Finnish personal identity code and Finnish online banking credentials, a mobile certificate or an electronic ID-card you can log in to [My Studyinfo's "Applications and accepting an offer of admission" section](#).
- You can only submit one (1) application form in this joint application. If you submit several application forms, only the newest one will be taken into consideration and all others will be deleted. Higher education institutions will not inform applicants about deleted applications.
- Please make sure that you allow enough time for filling in the application. Please remember to submit your application before the end of the application period (17 January 2024 at 3.00 PM EET) by clicking the Submit application button in the top right corner. You can preview your application and check the answers you have given by using the Edit-Preview toggle in the top right corner.
- If you wish to cancel your application please contact the admissions services of the higher education institutions you have applied to. NB! If your application has been processed to a point where you have admission results the application cannot be cancelled. The admission results are published at different times during spring.

## Questions or problems?

- If you have questions about the application or admissions criteria, please contact [the higher education institutions' admissions services](#)

## HOW TO CHOOSE THE STUDY PROGRAMMES

### Consider the following when you add study programmes to your application form:

- You can apply to up to six (6) study programmes in this joint application.
- You can fill in only one (1) application form in this application, so choose the study programmes carefully.
- You do not have to place the study programmes in order of preference, and you can be offered admission to several study programmes. For example, if you are offered admission to three out of four study programmes on your application, you can choose which offer of admission you wish to confirm. Please note that you may accept **only one** offer of admission to a study programme leading to a higher education degree in Finland in education that begins in the same academic term.
- You cannot choose which admissions procedures you will be included in. You will automatically be regarded in those admissions procedures where you are eligible to be admitted. See further information about the different admissions procedures in the study programme's admissions criteria.
